- [Top referrers and paths](#)

Views

Unique visitors

Cumulative: 480

Total views

Cumulative: 1471

Clones

Unique cloners

Cumulative: 7070

Total clones

Cumulative: 12673

Stargazers

Each data point corresponds to at least one stargazer event. The time resolution is one day.

Forks

Each data point corresponds to at least one fork event. The time resolution is one day.

Top referrers and paths

Note: Each data point in the plots shown below is influenced by the 14 days leading up to it. Each data point is the arithmetic mean of the “unique visitors per day” metric, built from a time window of 14 days width, and plotted at the right edge of that very time window. That is, these plots respond slowly to change (narrow peaks are smoothed out).
